flight news for you

The Fast and The furious The pylons tell the truth!!

Inside this issue:

Opening of May meeting	2
Tough luck winners	2
Raffle winners	2
New Items for you	3
Up coming mall show	4
Good bye to clubs	4
Thank you closing pace	6

The first race day for the competitors in our club was May ,20, 2007 These names were Dave Sullivan, Pete Blum, Rob Blum and Kris Caron Visitors we know are Jason Vernon. The day was here, the weather cool , the race planes getting tuned up, and the nitro all around. Dave racing his new P47, running a very potent YS-110, Pete and Rob both sporting their P51, Dago Red with OS two-strokes, Kris with his P51 Dago Red running a YS-91 and Jason with his Miss RJ P51 with a YS 110. The Bronze class was to start with a jumped start black flagging Pete and placing Kris into a third finish place only to be rerun to the good fortune of Pete. The day

would close with the finish being Pete in First winning \$130.00 Ollie Merrill 2nd And Kris in 3rd winning \$50.00 for his efforts.

Silver had Rob Blum running his Dago red but this was not to be his day of glory with the competition in the class the podium was not to be.

Dave was set in one of the fastest races I have seen to this point there were names as Rich Verano from YS parts and service and Dave being in the same heat and what a scorcher it was both getting zeros in the race for the break-outs but racing Rich was a chore with times of 1.16 and 1.17 for the ten laps Rich tore it up but in the end it

The last flight of the Miss RJ. R.I.P

is all just fun for all.

The tragedy of the day being the crash of the Miss RJ when the aileron fluttered and rolled over and in. With my spare plane Jason finished 3rd winning \$50.00.

Put Your Hands Together

- Is Carl making a fashion statement or is this the new dress code?
- Work crew makes a mountain of a difference for the trash.
- Is landing gear optional after flight?
- 192 members for the club.

Keeping our site clean

Bud has worked hard to get the area cleaned up so the County will see our club making the difference for the area. With this comes a sacrifice on all of our part in the way of all of us are in the adopt the road program. Eagles nest is now Mather Aerospace Modelers road lets show support for this area and all of Buds work to keep it clean. If you see trash on the road pick it up and add it to the pile. The pile is set to be picked up on July 15, 2007 by the county .

May 2007 Meeting opens with 26

The May meeting opens with 26 present.

Victor opened the meeting at 7:40 p.m. with greetings to all and welcoming the new member, Joe Crevice, Joe is a returning pilot with a little time lapse welcome Joe to the club when you see him.

The newest update to the member count was given by Mike with the secretaries report at a count of 192.

Hank gave the treasures report

and you may contact him for more information on it if needed.

The Bi-laws committee did not meet this month but will continue working on it independently until the next meeting.

Container keys are available from the club with your signature.

There is a mail box address change check with Hank on the new address all mail will be forwarded to Hanks work ad-

dress for the interim.

The run up stands will be moved to the side of the container for the safety and noise level of the pilots in the boxes.

Next meeting will be at the field and will remain there for the summer months show your support and votes after all this is your club.

Shade structures are in the works and will be there soon for the new pit area.

Mays meeting sees Richard. Welcome back

Tough luck winners this month goes to!

Jung for the constant ripping off of the landing gear from his Fontana X along with the bulkhead but will it return to fly again? This plane has been in trouble before with the ripped off landing gear disease. Also with the same illness was Vic with his giant scale crop-duster I don't think any of us really know what the plane really is)

and Kris with his funtana tearing out the plastic screws to his landing gear these really save the fuselage from damage. Last to make the grade is Vic's mystery friend from Elk Grove tearing his landing gear from his funtana 40.

Then away from the club would be Jim Smith and Mark

Sumich in a spectacular finish line crash, Jason Vernon with a loss of Miss RJ in an air structure failure.

Though there is times where things happen remember your limits and the aircrafts limits you are fling for the safety of all

Winner, winner, winner, winner Will the luck of the draw continue? Or are you next!

We thank RC Country for the continued help with our raffle at the club meetings. Were you a winner this time? Here is who was!

1st draw went to Frank and his choice would be the Harrier 3D

2nd draw went to Stan he took the flight pack.

3rd draw went to John he picked the gallon of fuel.

4th draw went to Hank he took the \$15.00 gift certificate.

5th draw went to Frank again for the Robart plane stand.

6th draw went to Frank again for a \$15.00 gift card.

7th draw went to Bob he took a \$15.00 gift card.

8th draw went to Stan for the propellers.

(9th went to Vic he picked up the allen wrenches.

And the final prize went to Frank! 4 times for \$20.00.

SHOW,PLAY,WIN,WIN,WIN, WIN

New Items available to you

The World Models is proud to announce the release of their 1/7 scale AT-6 Texan.

This pre-built and covered model is delivered with pre-installed retractable landing gear and is covered on The World Model's own ToughLon and LighTex premium iron on covering in an easy to see and attractive scale scheme.

Almost-Ready-to-Fly!
An easy airplane to fly, with a fast roll rate, especially to the right!!! At just 1.2LB flying weight, the plane is quite light and agile. Capable of operating from unimproved grass runways, the aircraft is easily maintained, even "in the field."

Many pilots and groups have opted for the Yak-54 because of its rela-

The Servo Tester (SVT) is a diagnostic tool for testing servos used in radio control systems. It can also be used for testing electronic speed controls. The SVT can operate in one of two modes;

Features The World's 1/7 scale war birds collection. Top quality balsa and plywood construction. Pre-installed retractable landing gears. Functional split flaps for scale and smooth landings. Pre-painted fiberglass cowling with 3D transparent template. Covered with hand iron-on World Models' ToughLon and LighTex

tively low cost and high performance compared to that of similar category aircraft! It is an adventure into the world of aerobatics and along with it, it brings style, charisma and presence. Engine/Radio Equipment NOT included!

Up coming mall show

The upcoming mall show is July 21, 2007 So get a hold of Rex and see what you can do to make it a great success. And yes there is a lot to do in preparation for the show, so if you can help please get a hold of Rex and get involved. The Show needs members to man the tables and answer ques-

tions about Mather Aerospace modelers as well as the sport of fling. Even if you can not be there you can still have your airplane in the show all you need to do is contact Rex and get ready for " July 21, 2007" at Sunrise mall.

Lets make it the best yet July 21, 2007 At Sunrise Mall

The End of an Era

It is always sad to hear of the closing of a club or fling field this past month is no different the club known as the Model Masters which was at one time a local club has come to an end. With the closing of this club Mather Aerospace modelers

was gifted with \$2500.18 from the Model Masters as a token to them We have waved the initiation one time fee to any of their club members coming into our club. Thank You for the gift and we hope to see you soon in our club.

**Thank You Model
Masters From all of
us at Mather
Aerospace Modelers**

Show and tell with the small talk

We had two People with show and tell.

John brought a hand built Top Wing with tissue covering this plane known as the Miss Tiny was hanging in a garage for quite a few years prior to him coming in contact with it. We know a better life lay in store for it now that John has acquired it.

The second show and tell was from Mike Clawson . Mike found some blue foam around the hanger and assembled a electric biplane. The wings

were cleverly held by a lock joint for ease of disassembly good idea thanks Mike and John.

The last plane for Show and tell was a Over Night ARF Cap 232 from Eflite nice small plane well assembled.

All 3 of these members received a raffle ticket for bringing their planes to the Show and Tell.

The Club has decided to give a

plaque to the Hospital in thanks for their open facility for us to use.

Cap 232 by EFLITE

All Dogs need to be on a leash out side of the pit areas and all dog owners are responsible to clean up after their dogs.

June 2007

Mather the friendliest place to fly

WERE ON THE WEB AT
WWW.TAKEOFF.TO/MATHER.COM

Mather Aerospace Modelers is located North of Keifer Blvd on Eagles nest road. Our site has accepted all styles of fling , 3D, Speed, Sport. Electric areas are available at our site as well as a helicopter site operated by the Sacramento Rotery Wings.

Requirements to fly are: **AMA Membership card IN POSSESSION** and **an invitation from a member present** if you are not a member of the club. **You must read and accept all posted rules at the field** and have some prior experience if not teathered to a training box with one of our trainers. We are here to have safe fun with friends and family and promote this at all times.

Flying is fun , Have fun and fly

Thank you for your help

Thank you RC Country
From all of us to all of
you

We would like to thank the hobby shops in the area and the ones that help with our raffle month after month.
